

**TEXTURED**

With a range of materials including leather, fabric and linen, you can achieve a 3-D, textural effect for your walls. Some in the selection come with embossed designs, which is an unconventional take on wallcoverings.

Try using darker shades of textured wallpaper in the bedroom for an understated yet contemporary style inspired by the designs of luxury hotel suites.

TIP

To complement the style, choose furniture in neutral shades for a coherent look to avoid overwhelming the space. This allows the floral designs to stand out.

## NATURE-INSPIRED

Soften the look of a concrete jungle with nature-inspired furniture. From fabrics with botanical and floral motifs, to textural surfaces reminiscent of leaf veins, bring nature and greenery indoors (and style your home with plants for a restful ambience).

### TIP

When choosing furniture, always pick the bigger pieces first as their colours and materials will anchor the space. Smaller pieces will then accentuate and complete the look.
