PATTERN BOOK OF

Fabrics & Wallpapers

2012/2013

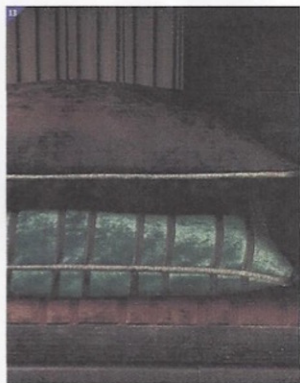

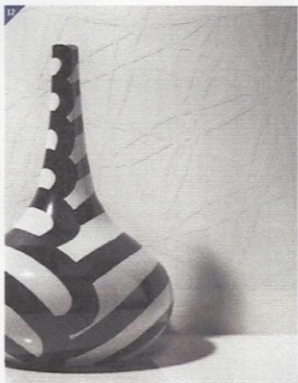

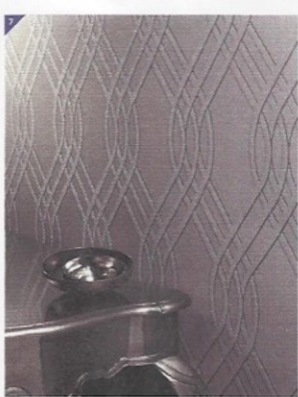

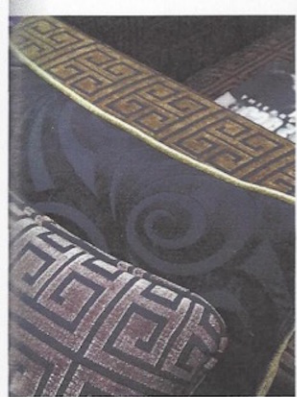

Diversity plays a huge role in the new wave of fabrics and wallpapers that's identified by a variety of colours, motifs and materials. Dazzling displays of shiny pastels and vivid prints in addition to tactile materials have become favourite options to add a new dimension to the living space, creating visual focus with stunning effect. Meanwhile, the reign of a subtle and relaxed colour palette such as soft greens, cool blues and muted purples are imminent in the interiors. Whether they are used alone or combined as a harmonious composition, these characteristics set the tone for the coming year.
